Total	8,870,000.00	1,964,000.00
-------	--------------	--------------

Significant Accounting Policies

1. Basis of Preparation

The financial statements have been prepared in accordance with the provisions of the Companies Act, 2013 and comply in all material respects with the applicable Accounting Standards notified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014, and the relevant provisions of the Act, presented in the format prescribed under Schedule III to the Companies Act, 2013.

2. Revenue Recognition

Revenue from the sale of goods is recognized when significant risks and rewards of ownership are transferred to the buyer, usually on dispatch or delivery, and is measured at the fair value of consideration received or receivable, net of returns, trade discounts, and applicable GST. Revenue from services is recognized on completion of the service or proportionately over the period of the contract, as applicable. Interest income is recognized on a time-proportion basis and dividend income when the right to receive payment is established.

3. Property, Plant and Equipment

Property, Plant and Equipment are stated at cost of acquisition or construction, less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price, import duties, non-refundable taxes, and any directly attributable cost of bringing the asset to its working condition for its intended use. Depreciation is provided on the Written Down Value / Straight Line Method over the useful life of the assets as prescribed under Schedule II to the Companies Act, 2013.

4. Inventories

Inventories are valued at the lower of cost and net realizable value. Cost is determined on a First-In-First-Out / Weighted Average basis and includes all costs of purchase, costs of conversion, and other costs incurred in bringing the inventories to their present location and condition.

5. Borrowing Costs

Borrowing costs directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset until the asset is ready for its intended use. All other borrowing costs are recognized as an expense in the Statement of Profit and Loss in the period in which they are incurred.

6. Income Taxes

Tax expense comprises current tax and deferred tax. Current tax is measured at the amount expected to be paid to the tax authorities using the applicable tax rates and tax laws. Deferred tax is recognized on timing differences between taxable income and accounting income, subject to the consideration of prudence, and is measured using tax rates that have been enacted or substantively enacted by the balance sheet date.

7. Cash Flow Statement

The Cash Flow Statement has been prepared under the indirect method as set out in the applicable Accounting Standard on Cash Flow Statements, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, deferrals or accruals of past or future cash receipts or payments, and items of income or expense associated with investing or financing cash flows.

8. Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value and subsequently measured at amortized cost or fair value depending on their classification and the Company's business model for managing them.

9. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases, and the related lease rentals are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

10. Employee Benefits

Short-term employee benefits, including salaries, wages, and bonus, are recognized as an expense at the undiscounted amount in the Statement of Profit and Loss for the period in which the related service is rendered. Post-employment benefits such as gratuity are accounted for on the basis of actuarial valuation, or on a reasonable estimate basis where actuarial valuation has not been obtained.

11. Foreign Currency Transactions

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currency are translated at the exchange rate prevailing at the balance sheet date, and the resulting exchange differences are recognized in the Statement of Profit and Loss.

12. Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount is estimated, and an impairment loss is recognized in the Statement of Profit and Loss to the extent the carrying amount exceeds the recoverable amount.

13. Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Contingent liabilities are disclosed when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Contingent assets are neither recognized nor disclosed in the financial statements.
